

Hancock Street

Stage 1 Consultation

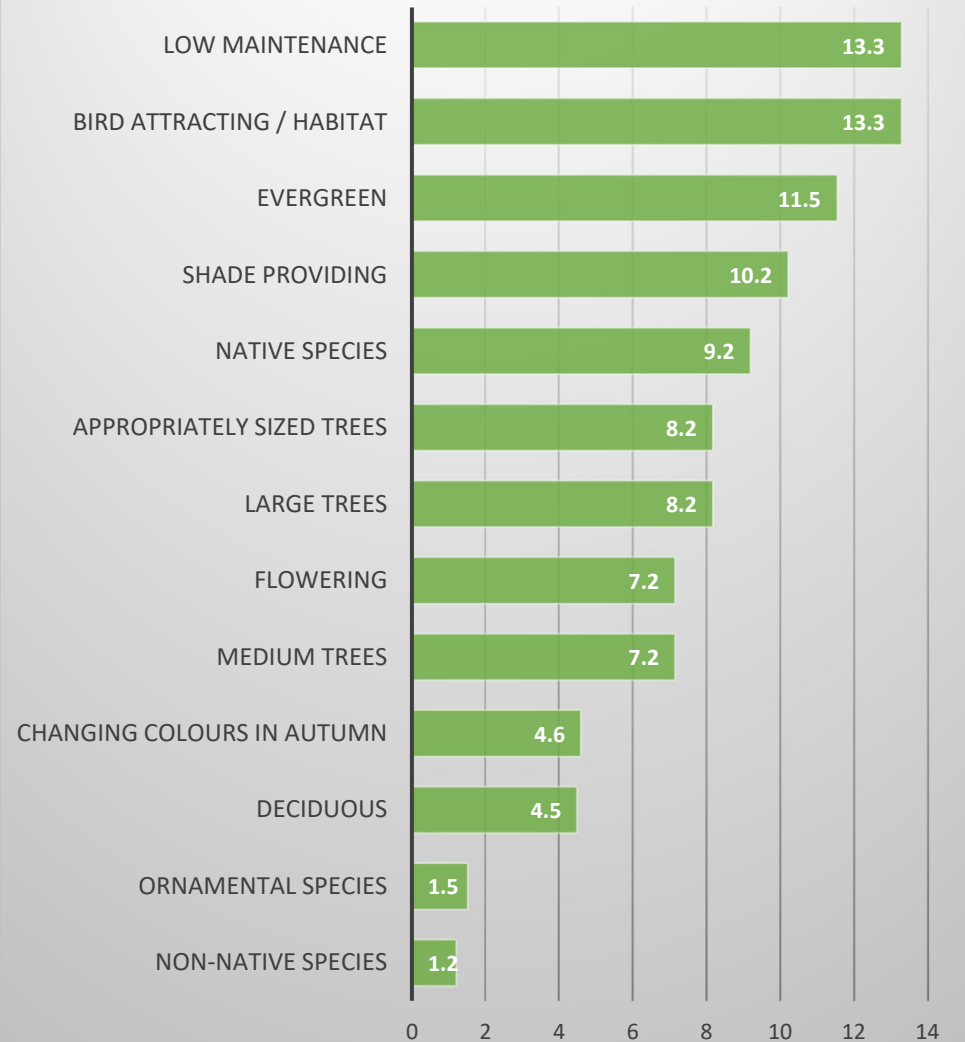

Survey Results

We asked...

Which species attributes do you prefer?

We gave you 100 points to distribute to the species attributes that are important to you.

Grace St - Species attributes score %

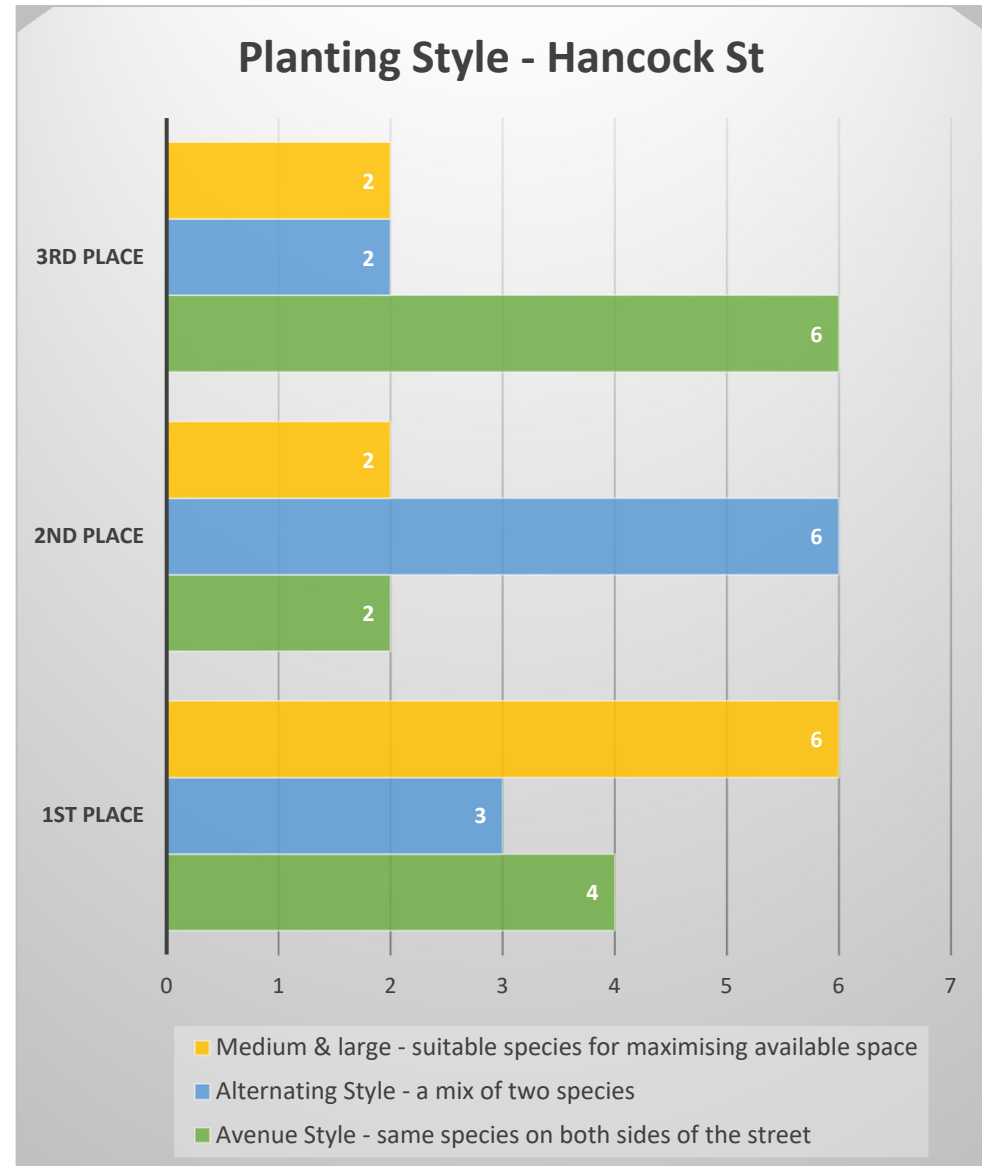

We asked...

Which planting style do you prefer?

You ranked your planting style preference in first, second and third preference:

- Medium and large (suitable species for maximizing available space)
- Alternating Style (a mix of two species)
- Avenue Style (same species on both sides of the street)

We asked...

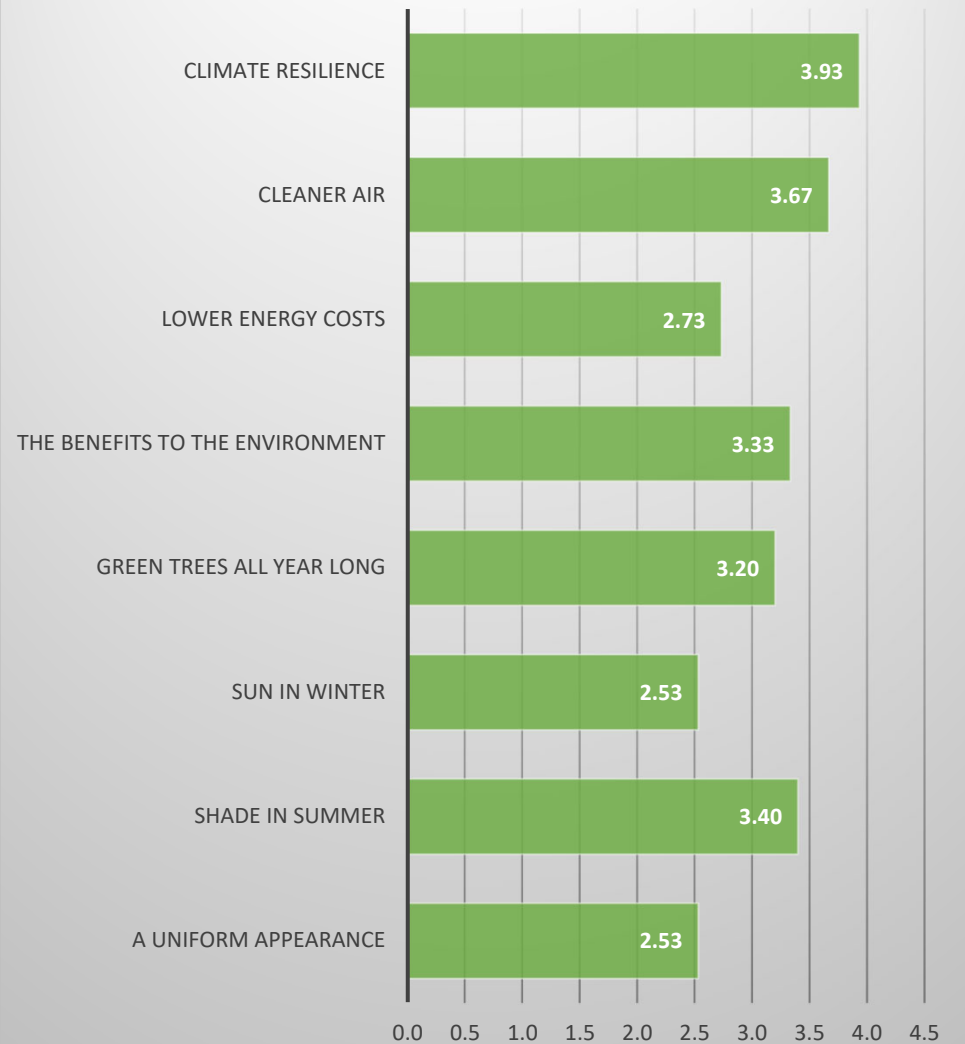

What do you find important about street tree selection?

You gave each category a score of 1-5 to indicate the importance for street tree selection.

1 = Low importance

5 = High importance

Hancock St - Street tree selection

We asked...

Do you have any more feedback?

We identified these themes
