

# Building OUR URBAN FOREST

URBAN  
FOREST  
Strategy

HOBSONSBAY  
CITY COUNCIL

10 August 2022

Dear Grace Street Resident,

## Green Streets program – Final streetscape design

This letter is intended to provide an update to the Green Streets Program for Grace Street, Laverton.

Following the two on-site consultation sessions and subsequent feedback periods, it became clear that the preference was to see an avenue style planting of mixed deciduous and evergreen trees.

The species we have chosen for this style is the *Jacaranda mimosifolia* and *Corymbia maculata* 'ST1 Lowanna'

Please see overleaf for a copy of the proposed tree planting plan. Slight changes to planting locations may have to occur on the day of planting due to locations of underground and above ground services.

The new trees will be planted by Council's arboricultural team towards the end of August. You will be invited to attend on the planting day, meet the team and celebrate the completion of the project.

For more information about the Green Streets Program for your street, including the in-depth results of the consultation periods, please visit <https://participate.hobsonsbay.vic.gov.au/urban-forest-strategy/grace-street-green-street> or scan below the QR code.

If you have any enquiries regarding the Green Streets program, please contact Adele Scharper on 9932 1289 or email [urbanforest@hobsonsbay.vic.gov.au](mailto:urbanforest@hobsonsbay.vic.gov.au)

Yours sincerely,

Andrew Fox
